

Pride Month Campaign Unisex Toilets

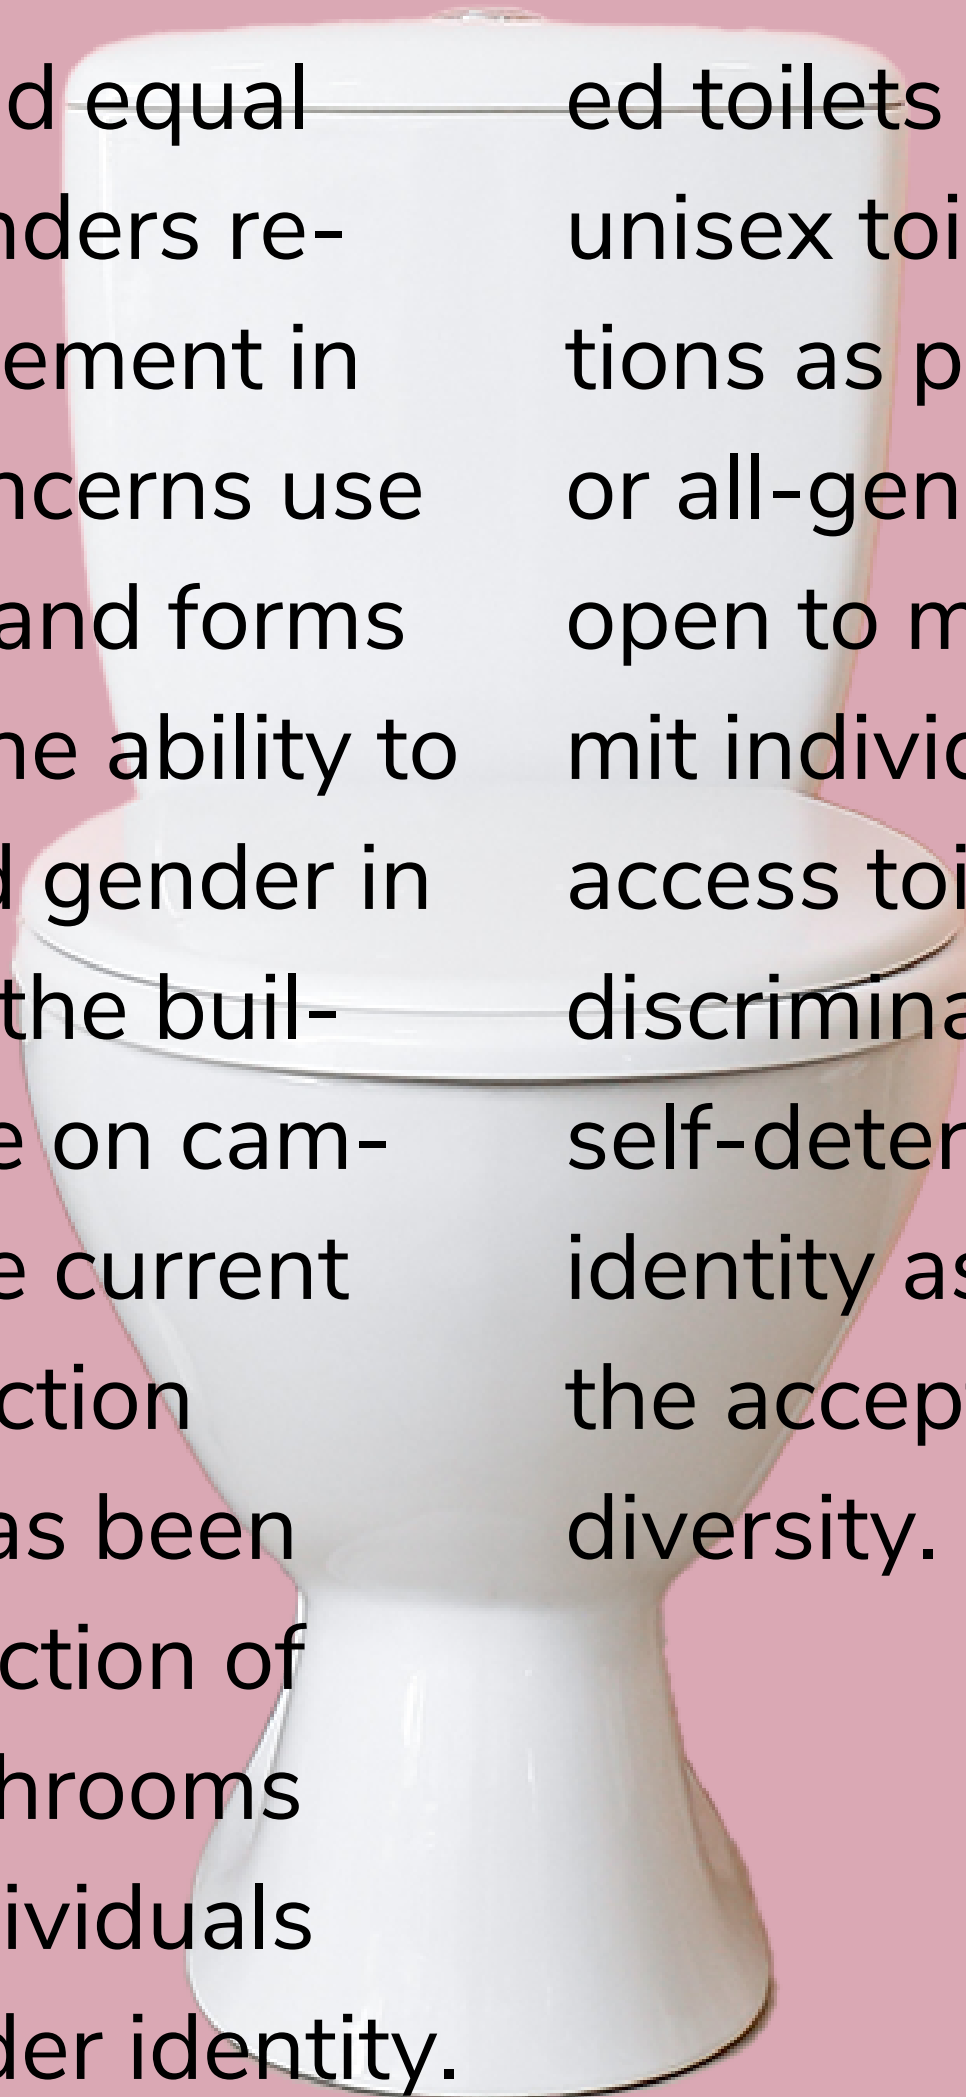

#AllGenderUniBonn

JUNE 20TH-24TH, 2022

What is this campaign about?

Gender diversity is a part of society, including universities. Institutions have the responsibility to create an environment in which their members and visitors can work and study without experiencing discrimination. Commitment to ensuring diversity and equal opportunities for all genders reveals a need for improvement in different areas. This concerns use of language, pronouns and forms of address, as well as the ability to change one's name and gender in official documents and the buildings and infrastructure on campus. In the course of the current renovation and construction works, our university has been looking into the introduction of "all-gender toilets": bathrooms that can be used by individuals regardless of their gender identity.

This June the Equal Opportunities Office and the Queer Department of the General Students' Committee (AStA) teamed up for a campaign as it is International Pride Month. From June 20th to 24th, 2022 selected toilets will be rededicated to unisex toilets in as many locations as possible. Unisex toilets or all-gender toilets are not only open to men or women but permit individuals of all genders to access toilets while reducing discrimination, increasing the self-determination of gender identity as well as encouraging the acceptance of gender diversity.
